

Thank you for choosing this Icom product.  
READ ALL INSTALLATION MANUAL carefully and completely before using this product.

**z SUPPLIED ACCESSORIES**

The following accessories are supplied with the transceiver. Carefully check the quantity of each part.

q	Mounting bracket	1	!	Screw (No. 6 × 1/2)	1
w	D-Sub 25 pin connector	1	!	Nut (No. 6)	1
e	Connector pins (M99029/63-368)	25	!	Crimp nuts (No. 6)	6
z	Screws Blind UNC (No. 4 × 3/8)	2	!	Speed nut UNC (No. 6)	4
t	K-Lock Nut (No. 4)	2	!	Screws (No. 6 × 1/2)	6
y	BNC-LP	1	!	COMM1 sticker	1
u	Washer (Icom washer V)	1	!	COMM2 sticker	1
i	C-shaped ring	1			
o	Antenna cable clip	1			
!	Self crimping nut (No. 6)	1			

The following items are required for installation but are NOT supplied with the transceiver.

- VHF antenna for the air communication band
- Various cables
- An antenna cable with a BNC connectors (50 Ω)
- Switches to be mounted on the aircraft yoke
- Headphones (500 Ω)
- Low-impedance carbon or dynamic microphone
- Preamplifier for a dynamic microphone

**D COMM1 and COMM2 stickers**

When two transceivers are installed, attach the supplied COMM1 and COMM2 stickers to distinguish one from the another.

Icom, Icom Inc. and Icom logo are registered trademarks of Icom Incorporated (Japan) in Japan, the United States, the United Kingdom, Germany, France, Spain, Russia, Australia, New Zealand, and/or other countries.

**b INSTALLATION PROCEDURES**

- Check the quantity of parts. Refer to **z SUPPLIED ACCESSORIES**.
- Prepare miscellaneous items required for installation. Refer to miscellaneous items in **z SUPPLIED ACCESSORIES**.
- Prepare the required wiring. Refer to **m CONNECTOR INFORMATION** and **CONNECTING THE CABLES FOR D-SUB 25 PIN**.
- Assemble supplied mounting bracket and other parts. Refer to **z MOUNTING BRACKET ASSEMBLY**.
- Cut the mounting hole. Refer to **MARKING A MOUNTING HOLE**.
- Mount the transceiver into the mounting bracket. Refer to **MOUNTING TO THE BRACKET**.
- Check the transceiver operation. Refer to **OPERATION CHECK**.

**n PRECAUTIONS**

NEVER bend the cables sharply or place the cables too near the aircraft control cables.

DO NOT place the transceiver where hot or cold air blows directly on it.

AVOID placing the transceiver in areas with temperatures below -20°C or above +55°C (-4°F to +131°F).

NEVER connect the transceiver to a power source using reverse polarity. Reverse polarity will damage the transceiver.

To prevent voltage drops, solder or crimp the cable lug when connecting the DC power cable to the power supply.

Use a 50 Ω, vertically polarized, VHF air band antenna. VSWR should be less than 2.5:1.

Mount the antenna on a flat metal surface or install a ground plane of at least 120 cm<sup>2</sup> (18 in<sup>2</sup>).

**m CONNECTOR INFORMATION**

**D D-sub 25-pin**

Pin	I/O	Description	Pin	I/O	Description
1	In	Memory Channel Switch*	14	-	Aircraft ground
2	In	Transmit/Receive Interlock	15	-	Aircraft ground
3	In	Frequency Exchange Switch*	16	In	PTT*
4	In	DC power + (13.8/27.5 V)	17	In	Intercom switch*
5	In	DC power + (13.8/27.5 V)	18	Out	External speaker (4 Ω/5 W)
6	-	RS-232C Serial data (GND)	19	-	External speaker (GND)
7	Out	RS-232C Serial data (TXD)	20	Out	Headphones audio (500 Ω/60 mW)
8	In	RS-232C Serial data (RXD)	21	In	External Dimmer control
9	-	Microphone (GND)	22	-	Headphones audio (GND)
10	In	Microphone 1 (600 Ω)	23	In	Auxiliary audio 3
11	In	Microphone 2 (600 Ω)	24	-	(reserved)
12	In	Auxiliary audio 1	25	-	(reserved)
13	In	Auxiliary audio 2			

\*Ground to activate.

**x IMPORTANT**

READ THIS INSTALLATION MANUAL CAREFULLY before install the transceiver. This installation manual contains important safety instructions.

NEVER install the transceiver where normal navigation of the aircraft may be hindered.

NEVER install an antenna near any aircraft projection, engine, or propeller.

Install a circuit breaker between the aircraft battery and the transceiver.

Check operation after installation.

Install the transceiver according to the procedures of this installation manual.

The antenna should be spaced at least 50 cm (1.6 feet) from any position occupied by any person on board the aircraft or the vehicle.

**c SPECIFICATIONS**

Model	Part Number <sup>1</sup>	Version	Equipment Class	Channel Spacing	Carrier Power
IC-A220	IC-A220T-1-01	USA-06	Receiver: D, E Transmitter: 4, 6	8.33/25.0 kHz	8 W

(1) Part Number  
( IC-A220T ) - ( 1 ) - ( 01 )  
Base Part Number - (SW/HW Identifier) - (TSO Minor Change Number)  
SW/HW Identifier  
1: Hardware Change Only  
2: Software Change Only  
3: Hardware + Software Change  
TSO Minor Change Number  
TSO Minor Change Number with initial value 00 and an increment of 1

Operating Temperature Range	-20°C to +55°C. For more details see the Environmental Qualification Form on the Dealers Only page on <a href="http://www.icomamerica.com">www.icomamerica.com</a> . The EQF part number is A220-0651-0001.
Environmental Testing	See Environmental Qualification Form on the Dealers Only page on <a href="http://www.icomamerica.com">www.icomamerica.com</a> . The EQF part number is A220-0651-0001.

**v INSTALLATION LIMITATION**

The conditions and tests required for TSO approval of this article are minimum performance standards. Those installing this article, on or within a specific type or class of aircraft, are responsible for determining that the aircraft installation conditions are suitable for the TSO article.

TSO articles must have separate approval for installation in an aircraft. The article may be installed only if performed under 14 CFR part 43 or the applicable airworthiness requirements.

**CONNECTING THE CABLES FOR D-SUB 25 PIN**

**D Power cable wiring**

Use two pairs of #20 AWG wire for the power and power grounding connections.

- Circuit breaker**  
To prevent physical damage, a 10 A circuit breaker MUST be installed in the DC power line in the aircraft. Install the circuit breaker in the aircraft breaker panel or instrument panel to ensure easy access during flight.
- Power Ground**  
Connect the transceiver power ground to the aircraft ground.

**D Yoke-mounted memory and frequency exchange switches**

For the yoke-mounted memory and frequency exchange switches, use a two-position spring loaded rocker switch or two separate momentary push switches.

**D Transmit/receive interlock connections**

When two transceivers are installed, connect pin 2 to the other transceiver's PTT line, and connect pin 16 to the other transceiver's interlock line to prevent both transceivers from simultaneously transmitting. However, when two transceivers are installed through a dual audio panel, the connections are not necessary.

**D Audio line connections**

Use #20 - #24 AWG wires for connections.

NOTE: If any external intercom system is in use, we recommend that you disable the transceiver's intercom function to prevent degradation of the audio signal. If any degradation exists, leave pin 17 disconnected and disable the transceiver's intercom function by following the steps below.

- While holding down [DUAL], rotate [VOL] to turn ON the transceiver.
  - The configuration menu is displayed.
- Rotate [O-DIAL] to select "INCOM MODE."
- Rotate [DIAL] to set "INCOM MODE" to OFF.
- Push [RC] to exit the Configuration menu and restart the transceiver.
  - "I.C.S." disappears.

## ▷ MOUNTING BRACKET ASSEMBLY

## ▷ MARKING A MOUNTING HOLE

### D Notes for marking the mounting hole

The transceiver can be mounted securely in the supplied mounting bracket.  
Remember to allow adequate space for installation of cables and connectors.  
When installing two or more transceivers in a stack, the mounting bracket should be 1.3 mm (0.05") apart.

The mounting bracket has 0.6 mm (0.024") dimples in the top, bottom, and both sides for proper spacing.  
Mark and cut the mounting holes.  
To support the mounting bracket, the rear mounting bosses should be attached to the airframe.

### D Mounting bracket dimensions

### D Front panel dimensions

Allow space for the front panel as shown above.

### D Template

Cut out dimensions for the mounting bracket as follows.

## ▷ MOUNTING TO THE BRACKET

### D Transceiver installation

- Remove the front panel from the transceiver's main unit.  
- Use a 3/32" allen driver.  
- Carefully disconnect the cable from the front panel. (Fig. 1)
- Insert a 3/32" allen driver into the lock screw and rotate the driver counterclockwise until the metal catch touches the back of the lock chassis. (Fig. 2)

Main unit front view

- Insert the main unit (transceiver) into the mounting bracket. (Fig. 3)
- Turn the lock screw clockwise until the main unit (transceiver) is fixed to the bracket. (Fig. 4)
- Connect the cable. (Fig. 5)
- Attach the front panel and tighten the allen screws. (Fig. 5)

Fig. 1

Fig. 2

Fig. 3

Fig. 4

Fig. 5

**CAUTION:** Make sure that the cable between the transceiver and front panel is securely connected. The transceiver may not function properly when loose or when a wrong connection is made.  
Improper cable connection can cause damage and result in a non-warranty repair.

### D Transceiver removal

The transceiver can be easily removed from the mounting bracket, if required.

- Remove the front panel from the transceiver's main unit.  
- Use a 3/32" allen driver.  
- Carefully disconnect the cable from the front panel.
- Insert a 3/32" allen driver into the lock screw and rotate the driver counterclockwise until the metal catch touches the back of the lock chassis.
- Slowly pull the transceiver out from the mounting bracket.
- Connect the cable to the front panel.
- Attach the front panel and tighten the allen screws.

## ▷ INFORMATION

### • FCC Grant of Equipment Authorization

Model	FCC ID	IC ID
IC-A220	AFJ297410	202D-297410

### D Non-TSO function list

These functions operate per the system requirements for this transceiver and do not interfere with the TSO MOPS compliance.

Function	Description
Weather Channels Reception	The radio provides reception of the weather channels which Icom America evaluated as part of the RTCA/DO-160G and RTCA/DO-178C test/verification process and additional system level tests were also performed.
Two Station Intercom	The radio provides a user interface to select two station intercom as an option to the pilot. This function was tested as part of the RTCA/DO-160G and the RTCA/DO-178C test/verification process and additional system level tests were also performed.

## ▷ OPERATION CHECK

Check the following points after transceiver installation.

- Polarity of the power supply.
- NO interference caused to other equipment.
- NO noise or interference from other equipment.
- VSWR is less than 2.5:1.
- Communication capability on both the highest and lowest communication frequencies, if possible.
